## Home Learning

- Blindfold a person and guide them around the house or garden (safely) and get them to listen carefully –what can they hear?
- Blindfold a person and see what they can smell. Lavender, garlic and lemon are good for this.
- You could do a blind fold taste test but make sure that an adult knows what you will be tasting.
- You could also draw round a person in your house and then measure how tall they are, how long their hands and feet are?
- You could draw a picture of yourself and label it on **Purple Mash –Science-About Me- Painting projects-My body**
